PROFESSIONAL SUMMARY

Senior Data Scientist with 7+ years of experience and an MBA from IIM Ahmedabad, delivering product, portfolio and business analytics across Fintech, CPG, and e-commerce domains. Experienced in product experimentation, customer analytics, pricing strategy, causal inference, and data-driven decision-making, partnering with cross-functional teams to drive product growth, customer engagement, and operational efficiency

CORE MEASUREMENT & TECHNICAL SKILLS

- Product Analytics & Experimentation: Funnel analysis, Incrementality studies, A/B testing, Causal Inference & Experimental Design, Statistics
- Machine Learning & AI: Machine Learning Model Development, Statistical Modeling, NLP, Generative AI Applications (RAG, self-service analytics tooling), Model Tuning & Validation
- Technical Skills: Python, SQL, PySpark, BigQuery, Databricks, Tableau, Claude Code
- Stakeholder & Documentation: Cross-Functional Collaboration, Technical Documentation, Executive & Client-Facing Communication, Team Leadership & Mentoring

EXPERIENCE

Senior Data Scientist | PayPal | Bengaluru, India | Jul 2025 – Present

- Led product analytics and experimentation across key customer journeys within the Resolutions & Protection organization, designing statistically rigorous A/B testing frameworks that identified a $1.2M+ cost-saving opportunity and informed product roadmap decisions.
- Developed a scalable end-to-end batch data pipeline to track and visualize portfolio metrics across Product, Policy, and Operations teams, automating previously manual reporting workflows and enabling stakeholders to monitor performance and identify opportunities.
- Partnered closely with Operations to analyze out-of-SLA costs across dispute journeys, using SQL & Python-driven analysis to identify key process and product bugs and collaborating with Engineering teams to prioritize and resolve root causes.
- Developed an AI-powered self-serve analytics solution using Claude Code for the Resolutions & Protection portfolio, enabling business stakeholders to query, explore, and deep-dive into key portfolio metrics through natural-language interactions.

Senior Consultant | Ernst & Young | Bengaluru, India | Aug 2023 – Mar 2024

- Mapped end-to-end customer journeys using Adobe Analytics to identify friction points and define measurement-driven product requirements for a major enterprise client, connecting mid-funnel behavior to business outcomes.
- Led NLP-based analysis of ~1M call and chatbot transcripts using topic modeling, sentiment analysis, and text classification to surface causal drivers of customer friction, reducing leakage to high-cost support channels.
- Designed and deployed a Generative AI document-retrieval chatbot (RAG), improving customer support efficiency by 12% and cutting query resolution time by ~10%.

Consultant | Fractal Analytics | Mumbai, India | Apr 2019 – Aug 2023

- Built Media Mix Models (MMM) to quantify the causal ROI of e-commerce promotional spend, enabling optimization of cost-per-click (CPC) budgets and identification of high-performing keywords, delivering measurable savings in advertising spend.
- Led pricing and promotion modeling using regression and causal analysis to reconcile marketing performance signals across European markets, generating an additional $800K in profit for an FMCG client.
- Developed a recommendation engine using collaborative filtering and ML-based personalization to target dealers and distributors for an Indian CPG manufacturer, driving 2.5% incremental sales growth.
- Modeled the search-rank algorithm of major e-commerce retailers, improving organic ranking of client products by 2.2 positions across European markets.
- Designed and implemented an inventory tracking and management dashboard (SQL, Python, Power BI), delivering $2M in supply chain cost savings.

Associate Analyst | Zycus Infotech | Mumbai, India | Aug 2018 – Apr 2019

- Cleaned, categorized, and curated procurement data across ERP systems, delivering insights that improved procurement strategies for key clients.
- Conducted User Acceptance Testing (UAT) for new product releases, minimizing post-release issues by 40% and ensuring data accuracy.

EDUCATION

- MBA - Indian Institute of Management (IIM), Ahmedabad | 2024 – 2025
- B.E., Electronics and Telecommunication, Mumbai University | 2014 – 2018

CERTIFICATIONS

- Databricks Associate Spark Developer 3.0
- Introduction to Generative AI - Google
- ETL pipelines using SQL on Databricks
- Deep Learning - Coursera
- dbt Fundamentals

AWARDS AND RECOGNITION

- PayPal PROPS Award - End-to-End ownership of high-impact product initiatives
- Best Upcoming Consultant - Fractal Analytics (exceptional team leadership)
- KAIZEN Award - Fractal Analytics (exceeding expectations on client-critical project)
- Good Samaritan and Spot Award - cross-team collaboration and fast delivery
